CRITICAL MINERALS BECOMES DEFINING ISSUE AT  
WEF ANNUAL MEETING IN DAVOS

UK MINISTER FOR INDUSTRY OPENS LANDMARK RARE  
EARTH MAGNET RECYCLING FACILITY IN BIRMINGHAM

CMA (UK) JOINS NO.10 MEETING LED BY CORNISH MPS

# JANUARY 2026

Welcome to the CMA (UK) Monthly Newsletter, featuring updates on the following news stories:

- Critical Minerals: A Defining Topic at WEF Meeting in Davos
- UK Minister for Industry Commends Work of CMA and APPG
- HyProMag Opens Landmark Rare Earth Magnet Recycling Facility
- CMA (UK) Joins Meeting at No. 10 Led by Cornish MPs
- CMA (UK) & CMA (USA) attend Future Minerals Forum 2026
- CMA (UK) Speaks at UKRI BBSRC Circular Bioeconomy Event
- CMA (UK) Moderates Forum on UK-Kazakh Strategic Partnership
- Win a £50 John Lewis Gift Voucher by Completing Our Survey
- Chinese Rare Earth Exports Surge to 2014 Levels Despite Tariffs
- US Proposes \$2.5 Billion Critical Minerals Stockpiling Bill
- Trump Signs Critical Minerals Processing Executive Order
- Win 1 Year of Spotify Premium by Completing Our Survey
- Ionic Rare Earths Receives £12M Offer from UK Government
- SML Raises £4M to Advance CRL's Redmoor Tin-Tungsten Project
- Welcoming Alba Mineral Resources to the Association
- DEScycle wins Prestigious EU Tech Funding from SPRIND
- Welcoming Arion Investment Management to the Association
- Aberdeen Minerals Wins £850k Investment from CAML

# CRITICAL MINERALS A DEFINING TOPIC AT DAVOS

3

From 19 to 23 January, the World Economic Forum held its Annual Meeting in Davos, welcoming global leaders to discuss critical issues and address key economic challenges.

Critical minerals was a defining topic at this year's forum, with discussions centering around the increasing 'scramble' for raw materials needed for the energy transition and AI revolution, with many state leaders such as Canadian Prime Minister Mark Carney advocating for international cooperation on diversifying and securing supply chains amid rising protectionism and geopolitical shocks.

Discussions also underscored the impact of this scramble on emerging economies and resource-rich nations, while industry leaders urged policymakers to urgently implement long-term industrial strategy.

# UK MINISTER OF INDUSTRY PRAISES WORK OF CMA (UK)

4

Many thanks to Chris McDonald MP, Minister for Industry, for praising the work of the Critical Minerals Association (UK) and the All Party Parliamentary Group (APPG) for Critical Minerals in the Houses of Parliament.

Thank you to Noah Law MP, Chair of the APPG, and Perran Moon MP, APPG Officer, for raising awareness of the UK's critical minerals sector in the House of Commons. Thank you as well as to Baroness Northover, Co-Chair of the APPG, for championing this vital agenda in the House of Lords.

The Minister's speech also included mentions of Cornish Lithium and Imerys British Lithium, two UK companies based in Cornwall that he vowed to visit and engage with.

# UK LAUNCHES RARE EARTHS MAGNET RECYCLING FACILITY

5

On 15 January, CMA (UK) representatives Kirsty Benham, Becca Kirk, and Enzo Granzella visited Tyseley Energy Park for the launch of the UKRI-funded Rare Earth Magnet Recycling Facility. The facility was opened by the Minister for Industry Chris McDonald MP, and welcomed over 100 attendees from across industry, academia, and government.

This world-leading facility is the first of its kind in the UK and reintroduces sintered magnet production for the first time in more than 25 years, supporting the development of technologies central to the UK's Modern Industrial Strategy.

Congratulations to the University of Birmingham, Innovate UK, Professor Allan Walton and his team at HyProMag Ltd, as well as their parent company Mkango Resources Ltd, for this incredible achievement and the successful launch of a landmark facility for the UK's critical minerals sector.

# CMA (UK) JOINS NO. 10 MEETING LED BY CORNISH MPS

6

On 13 January, Cornish MPs Perran Moon and Noah Law, Officer & Chair of the APPG for Critical Minerals, led a meeting with Anna Gerald MP at No 10 with the Prime Minister's Economic Advisor, HM Treasury, and the Department for Business and Trade on the strategic importance of Cornish critical minerals.

The meeting highlighted the region's tin, tungsten, and lithium opportunities, with commodities represented by Cornish Lithium, Cornish Metals, and Cornwall Resources Limited. A representative from the Cornwall Mining & Geo-resources Alliance, and Kirsty Benham, CEO and Founder of the Critical Minerals Association (UK), also attended on behalf of the wider industry in the region, including Imerys British Lithium, Tungsten West, and Cornish Tin.

# CMA UK & CMA USA ATTEND FUTURE MINERALS FORUM

7

From 13 to 15 January, Jeff Townsend, Founder of CMA (UK) and CMA International, attended the 5<sup>th</sup> Future Minerals Forum (FMF) with Dennis Gibson, Chairman of CMA USA.

The FMF is a premier conference driven by the Saudi Arabian government to foster collaboration and investment across the minerals value chain. Held annually in Riyadh, the forum convenes global stakeholders to secure supply through responsible sourcing and drive economic development across the super-region of Africa, Western and Central Asia.

Jeff was interviewed for FMF TV, where he advocated for aligning ESG through global equivalency, framing it as a practical route to responsible mining, lighter reporting burdens, and faster sustainability outcomes.

# WIN £50 JOHN LEWIS GIFT CARD WITH THIS SURVEY

8

Want to win a £50 gift voucher to John Lewis? The Critical Minerals Association (UK), in partnership with Innovate UK, is inviting stakeholders to take part in a short survey to inform workforce forecasting in the critical minerals sector.

The responses to this survey will help to us to identify crucial skill gaps, training needs, and funding requirements for talent growth across regions and the value chain.

The deadline to submit your insights is 13 February. One lucky respondent will be randomly selected to receive the £50 John Lewis gift voucher, as well as a free ticket to our 6<sup>th</sup> Annual Conference in London on 30 November at the start of London Mining Week 2026!

**TAKE THE SURVEY [HERE](#)**

# CHINA RARE EARTH EXPORTS SURGE TO 2014 LEVELS

9

In 2025, China's exports of rare earth elements climbed to about 62,585 metric tons, marking the highest annual total since 2014 despite Beijing imposing export restrictions on rare earths last year.

Following U.S. tariffs in April 2025, the Chinese Ministry of Commerce initially imposed export restrictions on several medium and heavy rare earths and related magnets. The move caused magnet shipments to plunge in April and May, but exports began recovering in June after trade agreements with the U.S. and Europe eased tensions.

Shipments also dipped in December as buyers slowed purchases after stockpiling for the holidays, but remained significantly higher than last year, reflecting growth in global demand even amid geopolitical and trade pressures.

# CMA (UK) MODERATES UK- KAZAKH FORUM

10

On 20 January, our Analyst Enzo Satkuru-Granzella attended a Mining and Critical Minerals discussion organised by the British-Kazakh Society (BKS), Foreign, Commonwealth and Development Office (FCDO), Department for Business and Trade (DBT), and Embassy of Kazakhstan in the UK.

The event together over 50 senior policymakers, industry leaders, and BKS members to examine how the UK-Kazakh strategic partnership is evolving. It was chaired by Rupert Goodman OBE and welcomed speakers such as Ruslan Karabulov (Chargé d'Affaires, Embassy of Kazakhstan in the UK), Her Excellency Sally Axworthy MBE (HM Ambassador to Kazakhstan) and Christopher Allum (UK Export Finance).

Thank you to the organisers for inviting CMA to attend and moderate the Q&A session. We look forward to continuing to support strategic cooperation between the UK and Kazakhstan on securing critical mineral supply chains.

**READ ON [HERE](#)**

# US PROPOSES \$2.5B CRITICAL MINERALS STOCKPILE BILL

11

On 15 January, U.S. lawmakers introduced bipartisan legislation for a \$2.5b strategic stockpile of critical minerals.

The proposal aims to protect the U.S. economy and national security from supply disruptions and price volatility, while reducing reliance on foreign suppliers.

The stockpile would be managed by an independent board, with minerals sourced from both domestic mining and recycling, stored across the U.S., and sold when necessary to stabilise markets. Profits would be reinvested to keep the reserve self-sustaining, and allied countries could participate by contributing funding.

Lawmakers argue the plan would strengthen domestic production, support clean energy and defence industries, and help to establish a Western alternative to foreign-controlled mineral pricing.

**READ ON [HERE](#)**

# TRUMP SIGNS NEW CRITICAL MINERALS EXECUTIVE ORDER

12

On 15 January , U.S. President Trump signed the first Executive Order of the year related to critical minerals, titled "Adjusting Imports of Processed Critical Minerals and Their Derivative Products into the United States".

The order places an emphasis on the use of international partnerships to strengthen US mineral security, and is focused on the trade of processed critical minerals. The order identifies price volatility as a fundamental weakness in critical mineral markets - and one that deters private investment, placing the long-term sustainability of U.S. mining, processing, and downstream manufacturing at risk.

The order also underscores mining critical minerals domestically does not safeguard the national security of the U.S. if manufacturers remain dependent on a foreign country for the processing of that mineral.

# IONIC RARE EARTHS RECEIVES £12M OFFER FROM UK GOVT

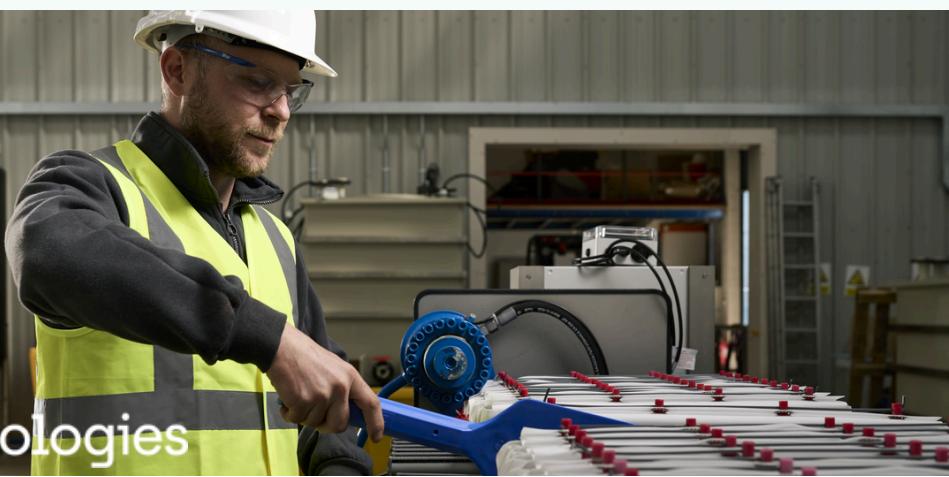

13

On 27 January, Ionic Rare Earths (IonicRE) announced that their wholly owned subsidiary Ionic Technologies has been provided an Offer in Principle for a £12 million capital grant from the UK Government to support the delivery of a commercial magnet recycling facility in Belfast.

This ground-breaking magnet recycling facility would produce 400 metric tonnes per annum of high purity separated magnet Rare Earth Oxides, utilising Ionic Technologies' patented long-loop recycling technology.

IonicRE is now advancing the remaining financing activities required for the project, with multiple parties appraising investment amid the national drive to deliver a secure and responsible rare earths supply chain for the UK's advanced manufacturing, defence and renewables sectors.

# SML RAISES £4M IN FUNDING FOR CORNWALL RESOURCES

14

Following the success of its matched Shared Prosperity Fund exploration programme at Redmoor, Strategic Minerals plc (SML) has raised £4 million through a placing and share subscription involving new high net-worth and institutional investors.

The funding will be used to advance and accelerate Cornwall Resources Limited's Redmoor tungsten-tin-copper project, Europe's highest-grade undeveloped tungsten resource.

The capital will primarily support further drilling at Redmoor, building on strong 2025 results, with infill drilling aimed at upgrading the JORC Inferred Resource to an Indicated Resource ahead of a mining prefeasibility study.

SML intends to progress the project rapidly into prefeasibility. Additional funding will support team, facilities, and economic activity in Cornwall.

# WELCOMING ALBA MINERAL RESOURCES TO THE ASSOCIATION

The CMA (UK) is delighted to welcome Alba Mineral Resources plc to the association.

Alba is a UK based, AIM-quoted critical minerals exploration and development company. The Group's portfolio includes the Motzfeldt Critical Metals Project, one of the largest rare earth and critical mineral deposits in Greenland.

Alba is also a major shareholder in GreenRoc Strategic Minerals, which is advancing the world-class Amitsoq Graphite Project in Greenland.

The Company is also pursuing a high-grade rare earth, copper and gold opportunity in Sweden.

Within the UK, Alba is looking to reopen the UK's most productive historic gold mine, Clogau-St David's, for commercial production.

# DESCYCLE WINS PRESTIGIOUS EU TECH FUNDING

16

DESCycle, a UK-based deep tech company developing sustainable ways to recycle metals, has been selected to participate in the SPRIND Tech Metal Transformation Challenge - one of Europe's most selective programmes backing technologies to reshape industrial systems.

"Being chosen reflects the growing belief that circular metals recovery must move beyond marginal efficiency gains and address structural weaknesses in global supply chains," says DEScycle in a statement on LinkedIn.

The programme begins with €1.5 million in funding, with the potential to scale to €6m as companies progress through technical and commercial milestones. It places DEScycle squarely inside a priority European agenda around critical raw materials, industrial resilience, and circular economy.

# CMA (UK) AT UKRI BBSRC CIRCULAR ECONOMY EVENT

17

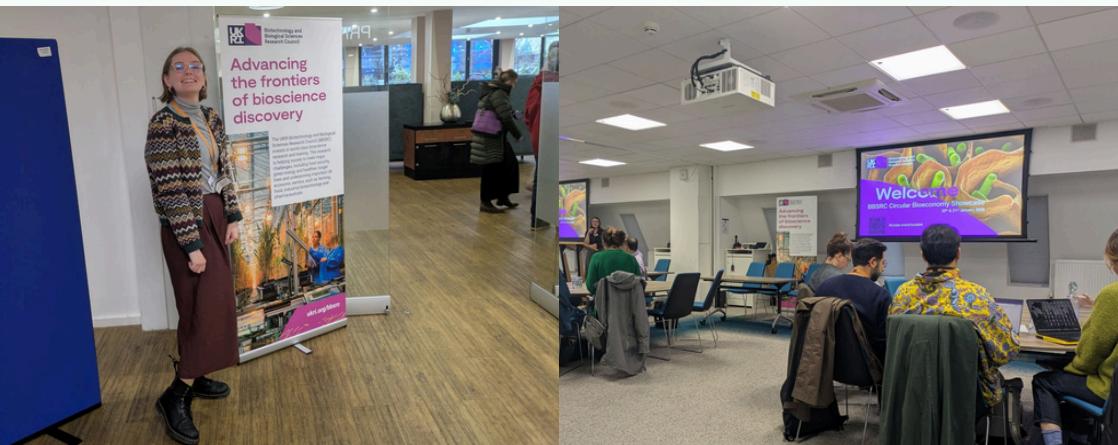

On 20 and 21 January, our Technical Analyst Becca Kirk attended the UK Research and Innovation (UKRI) BBSRC Circular Bioeconomy of Textiles and Metals Research Showcase at Aston University.

The event provided an opportunity for BBSRC grant holders to showcase their research and learn more about opportunities for the commercialisation of biotechnologies.

Becca presented on the opportunity for the circular economy of critical raw materials in the UK, and also contributed to a closed-door roundtable on strategic gaps and opportunities for bioscience within the UK's transition.

Thank you to UKRI for the invite, and for the opportunity to learn more about the breadth of research supporting a circular economy for critical minerals and materials.

# WELCOMING ARION INVESTMENT TO THE ASSOCIATION

The CMA (UK) is delighted to welcome Arion Investment Management to the association!

Arion Investment Management Limited is a London-based commodities investment management company authorised and regulated by the Financial Conduct Authority.

Arion targets absolute returns by providing investors with exposure to diversified commodity strategies via its multi-manager/multi-strat funds and managed accounts.

**READ ON [HERE](#)**

The logo for Arion Investment Management is centered on a white rectangular background. The word "ARION" is written in large, bold, blue capital letters. A stylized circular graphic, consisting of concentric arcs, is positioned to the right of the letter "O". Below "ARION", the words "INVESTMENT MANAGEMENT" are written in a smaller, gray, sans-serif font.

# £850K INVESTMENT INTO ABERDEEN MINERALS

19

On 8 January, Aberdeen Minerals announced a new £850,000 investment into the company from its largest shareholder, London-based Central Asia Metals Plc (CAML).

The investment will fund 'Phase 3' exploration drilling and geophysics at the Artrath Project area and other activities in Aberdeenshire, North East Scotland, where the company is exploring for nickel, copper and cobalt in partnership with local landowners.

The UK Government's Critical Minerals Strategy (November 2025) recognises nickel and cobalt as critical minerals, and copper as a growth mineral, each being "essential to the UK's economy, national security, and clean energy transition."

# WIN 1 YEAR OF SPOTIFY PREMIUM WITH THIS SURVEY

20

Are you a student studying in the UK, a graduate looking for career opportunities, or an early career professional working in the UK? Try your luck at winning 1 year of Spotify Premium by completing this quick survey!

The Critical Minerals Association (UK) is inviting all students, graduates and young professionals to share their views on the critical minerals sector.

The survey closes on 13 February, with the winner randomly selected and announced 2 weeks after the closing date.

Please share the survey with your friends, classmates and colleagues, and receive a free ticket to our next Critical Minerals Careers Fair at the Natural History Museum.

# JOB VACANCIES AT UK ENVIRONMENT AGENCY

21

Are you looking for a graduate job, an apprenticeship or a placement? The UK Environment Agency (EA) is currently hiring for 56 new positions!

The EA is looking to recruit for the following schemes:

- Processing Engineering Graduate
- Environmental Practitioner Degree Apprenticeship
- Environment and Science Graduate Training Scheme
- Business and Communications Industry Placement

Vacancies are located across the UK and salaries range from £25k per annum for industry placements, up to £32k per annum for graduate positions.

Find out more about early career opportunities, as well as application requirements and deadlines, on the EA website.

# NEWS ROUNDUP

The following news articles from Argus Media, Mining Weekly, Mining Magazine, Financial Times, and others, provide an overview of critical mineral mining for:

- Cobalt
- Copper
- Graphite
- Lithium
- Nickel
- Manganese
- Rare Earth Elements
- Tin
- Tungsten
- Vanadium

*The Critical Minerals Association (UK) takes no credit for any articles and makes no endorsement of any of the content.*

# Cobalt

- Africa
  - Democratic Republic of Congo [31.12.25]
    - DRC will allow cobalt exports under existing Q4 2025 quotas to continue until the end of March as delays persist in implementing its new quota system.
    - [Read the article here.](#)
  - Democratic Republic of Congo: CMOC Group Lt. [16.01.26]
    - CMOC Group Ltd. plans strong copper growth while keeping cobalt output at 100,000-120,000 tons, as DRC export quotas tighten supply and lift prices.
    - [Read the article here.](#)
  - Democratic Republic of Congo: Gécamines [16.01.26]
    - Gécamines plans to buy the indebted cobalt miner Chemaf for up to \$1 million and transfer it to a new investor under the US-Congo minerals pact.
